Hydro Milling Grouping Group
Milo H. Leach
3029 Stoney Brook Drive, Suite 101
Raleigh, North Carolina 27640

Dear Milo;

During March and April of 2001, Hydro Milling Grouping Group was hired to hydrolase steam and water piping at the Sutter Energy Center in Yuba City, California. At the time we were under a great deal of pressure to meet the growing demand for energy in California.

Under these conditions Hydro Milling Group was able to coordinate their effort to meet the start-up schedule and work successfully around the construction contractors short coming to timely turnover systems Hydro Milling was asked to clean.

The equipment used by Hydro Milling Group was in good working order and we experienced little down time. Hydro Milling Group personnel were good to work with, responsive and hardworking.

We believe that due to this cleaning the time normally spent to complete steam blow of the affected piping was reduced by 50 percent.

I would recommend Hydro Milling Group based on the success of this project.

Sincerely,

Wayne Luton,
Commissioning Manager
Sutter Energy Center
