Hydro – Milo
Address

Subject: Letter of Appreciation

To: Milo and the Crew

From: Roy N. Powell

We would like to take this opportunity to thank you and your entire staff for the outstanding job performed on our Units 93, 94 & 96 these past three weeks. The quality of your work was equaled by the pride and professionalism of your entire staff and directly contributed to the success of our "Initial Phase" of the lube oil flush on 96 steam turbine. This feat was accomplished in 10 days of flushing compared to the previous mark set on 85 steam turbine of approximately 2 months. We had many challenges with the configuration of the machinery that tested both our ingenuity and resolve to perform the job, and with the level of experience and dedication displayed by you and your staff we prevailed. I am sure that we will incorporate this type of cleaning in any future projects with the same success. We look forward to the opportunity of doing business with HydroMilling again. From all of us in WGI Startup and Commissioning we'd like to say "Thanks for all the help".

Sincerely,

Roy N. Powell
